

**Project Design Phase-I**  
**Proposed Solution Template**

Date	19 September 2022
Team ID	PNT2022TMID13758
Project Name	Project - Smart Fashion Recommender Application
Maximum Marks	2 Marks

**Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	People today struggle to find the time to shop for fashionable products. Therefore, we are putting the fashion system online, although there are other platforms where you may buy fashion accessories. They are unable to appropriately recommend products to users on those sites.
2.	Idea / Solution description	To create a online fashion website with chatbot to recommend a fashion items to the users.This platform should be light weight and it should also need to understand by all type of users.
3.	Novelty / Uniqueness	We have a chatbot that assists users in finding the finest fashion item for their personal style.
4.	Social Impact / Customer Satisfaction	The recommendation system and user Interface of the platform will satisfies the customer.
5.	Business Model (Revenue Model)	We are building a platform for the dealer so that he may sell his items through it and we will pay the dealer based on how well the consumer is satisfied with the product.
6.	Scalability of the Solution	We will charge dealers based on the quantity of goods they sell through our platform.
